FRDIAY AFTERNOON, DECEMBER 13, 1833.

The Allegheny Democrat has lately come forth much enlarged, and improved in its appearance, and its editor seems determined to act in a manner worthy the respectability of his paper.—He seems resolved to throw off the trammels imposed by a "junto," in this city.—Witness the following bold shout of triumph, in his paper, of this morning. We strongly suspect there was some trembling and chattering of teeth, in the vicinity of the Post Office, when the Democrat was read—

"We cannot repress our exultation at the election of Gen. M'Kean to the U. S. Senate. *He was bitterly opposed by a set of would be dictators, in this city—and we feel gratified at their discomfiture.* Senator M'Kean, we feel confident, will ably and faithfully represent the interests of his constituents. Let the disappointed junto carp at his election—they will procure no sympathy from the public. *This is the first, and, unless they mend their ways, not the last defeat they will lament.*"

COMMITTEE ON ROADS AND CANALS.—We are well pleased with the appearance of this committee. The placing Mr. Mercer, the early, able, and persevering friend of the Chesapeake and Ohio canal, on it, gives us reason to hope for a favorable response to our memorials in favor of that great National work. The Committee on Manufactures is also well constituted. Pittsburgh has, as she is justly entitled, a representative in that Committee.

Extract of a letter, dated

"WASHINGTON CITY, Dec. 9, 1833.

"The committees in the House of Representatives were announced to day. The three most important are composed of the following named members—

On Ways and Means.—Polk, of Tenn.; Wilde, of Ga.; Cambreleng, of N. Y.; Gorham, of Mass.; M'Kim, of Md.; Binney, Pa.; Loyall, Va.; M'Kinley, of Ala.; Hubbard, N. H.

On Manufactures.—Adams, Mass.; Huntingdon, Conn.; Denny, Pa.; Davis, S. C.; Corwin, O.; Dickerson, N. J.; Martindale, N. Y.; M'Comas, Va.; Osgood, Mass.

On Roads and Canals.—Mercer, Va.; Blair, Tenn.; Vinton, O.; Stewart, Pa.; Rencher, N. C.; Johnson, Md.; Lucas, Va.; Pope, Ky.; Slade, Ill.

EXTRACT

FROM THE REPORT OF THE STATE TREASURER.

The estimates of the receipts from the tolls on canals and rail roads, belonging to the State, is sanctioned by the Commissioners of the Internal Improvement Fund, and by the opinions and judgments of the Canal Commissioners. On the correctness of the estimate of the receipts into the Treasury from this source, will much depend, whether the gratifying results exhibited in the foregoing statements will be realized.

As the duty was first imposed on the State Treasurer, to make an annual report, on the subject of finance, to the Legislature, at the last session, his attention was directed to the point, how far the public works were to be regarded and likely to prove valuable sources of revenue, and his views of the subject were therein fully exhibited.

The experience of the past year fully confirms, in his judgment, the correctness of these views, and he is not aware of any untoward event of a character to change the favorable opinions he then entertained and expressed, of the future productiveness of the public funds.

The tolls of the past fiscal year amounted to $151,419 61, falling short of the estimate of the receipts from this source, $48,580 39, a deficiency which arose from the interruption of the navigation of the canals, in consequence of the great flood, which occurred in May last, the like of which had not been experienced for 40 years past.

The interruption to the navigation of the canals by this extraordinary flood, had a disastrous effect, particularly on the Delaware and Branch canals; notwithstanding these adverse circumstances, the receipts of tolls into the Treasury for the last fiscal year, have amounted to the sum stated, viz: $151,419 61. And it cannot be doubted, but that, for the causes above stated, the tolls would have greatly exceeded the amount of the estimate; causes which are not within the range of prudential calculation, and which are not to be expected to occur in the ordinary course of nature.

The estimate of the receipts from tolls, for the current fiscal year, is based on the experience of the past year, taking into consideration the adverse circumstances stated, the great extent of canals and railroads which will be opened in the spring, for navigation and travel, and on the important fact, that the great thoroughfare between Philadelphia and Pittsburgh, will have the advantage of an entire line of railroad and canal completed, on the opening of the spring.

Whatever disappointments have heretofore taken place, in the calculations which have been presented, from time to time, of the extent of canals and rail roads which will be prepared for use there can no longer exist a doubt of the fact, that there will be completed and fit for use the ensuing season, five hundred and fourteen miles of canal, and one hundred and eighteen miles of rail road, which information, will be furnished by the Canal Commissioners, in their annual report. If, in the unfinished state of the public works, enjoying a limited and partial operation, subject to the interruptions to which new works of the kind, are ordinarily exposed, and visited by two most extraordinary floods, such as have not occurred within a period of forty years before, the increase of tolls in the two last years has been from $45,550 58 to $151,419 69, it cannot be considered as extravagant to estimate the receipts of the tolls from the public works, during the current fiscal year at $500,000 00, when the great line of communication will be in active operation, and in addition to it, the Columbia rail road will have a single track completed and in use.

A comparison of the increase of tolls, on the canals of other states, particularly the canals of New York and Ohio, in the incipient stages, with the progressive increase of tolls of the canals of this state, will sustain and support this estimate, the estimate has been made by the Commissioners of the Internal Improvement fund, and the Canal Commissioners, after a careful and cautious investigation of all the circumstances having a bearing on the subject; and is submitted to the Legislature by the State Treasurer, with all the confidence of certain conviction, on his part, of its fairness and reasonableness.

In estimating the future productiveness of the public works, their intimate connection with those of the state of Ohio is viewed as a matter highly important. Fortunately, within a short period, the serious attention of the citizens of the commercial metropolis of the state has been awakened to the absolute necessity of this connection, to sustain and support its prosperity—and in the excitement produced, has had the most salutary effect, of originating measures which cannot fail to insure their speedy union, a consummation which will verify the most sanguine calculations, of the most ardent friends of internal improvement of the state.

By a fortunate coincidence, forty seven miles of the Columbia rail road, is made to form a part of a great line of communication, by a continuous rail road from New York to the city of Washington, a great part of which, is now constructed, and all of which will be in use, within a short period of time, a circumstance which will greatly increase the productiveness of this part of the Pennsylvania improvements.

The topics, which have been briefly referred to, have been deemed proper to illustrate the subject, on which it has been made the duty of the State Treasurer to make an annual report to the Legislature. The public works, the extraordinary expenditures incurred to execute them, and the probable amount of revenues to be derived from them constitute the most important items of the finances of the Commonwealth.

These statements are submited under a proper sense of the responsibility which necessarily attaches to the importance of the subject; and in their correctness and reasonableness, the state Treasurer feels confirmed by his own investigations of reflections.

If these statements and views are not founded in illusion and deception, it is certainly a gratifying consideration, that notwithstanding the gloomy forebodings, which predicted the embarrassment of the State, and the insolvency of the Treasury, an opposite state of things is presented; and if, in the incipient stage of the public works, under the many adverse circumstances attending them, the finances of the Commonwealth exhibit so flourishing an aspect, an earnest is afforded of the future prosperity of the State, when the public works will be in a situation to develope the rich and varying resources of the State, still dormant. And should the estimated amount of revenue to be derived from the public works, during the present year, be realized, and permanent, leaving out of view its certain future increase, the highly interesting and gratifying truth is presented, that, inasmuch as $500,000 00 will pay the interest, at five per cent., on ten millions of dollars, it is a virtual reduction of the public debt, created for the purposes of internal improvement, FROM UPWARDS OF SEVENTEEN MILLIONS OF DOLLARS TO SEVEN !!

It is with some degree of pride, that the State Treasurer adverts to the fact, presented in the exhibit of the state of the Treasury, at the end of the fiscal year 1834; from which it appears, that there will then remain a balance in the Treasury of $32,667 02, after paying all ordinary expenses of the Government, all miscellaneous appropriations now authorized by law, which will probably be required, the interest on the public debt, and in addition, pay off a portion of the public debt falling due within that year, viz: $380,000 00 of the stock loan of 1824.

NOTE.—Receipts of canal tolls into the Treasury, from 1st of November, 1833, till 6th December, 1833, date of this report, $24,205 54; principal western collectors not heard from.

IMPORTANT FROM PORTUGAL.

From the Supplement to the Lisbon Chronicle of 25th October, the Portuguese official paper, we translate the following extracts, being the latest news from thence received here direct.

"The enemy (Miguelites) having been attacked, beaten and driven from before the city, they fled, pursued by our brave troops, in the direction of Santarem. This forced rtreat of the rebels has cut off their communications with the fragments of their army which last year besieged Oporto, with the city of Coimbra and all the province of Beira Alta, and especially with the fortified town of Almeida, (where they have hundreds of persons incarcerated) and which was their general depot of warlike and other stores for the supply of their forces occupying a portion of that province and Tras-os-Montes.

"So soon as the inhabitants of the province of Estremadura perceived the direction taken by the rebels in their retreat, they immediately procured arms and with the most patriotic enthusiasm proclaimed the Charter, the Queen and the Regent.

"Colonel Souza writes from Moleanos, under date of the 24th inst. that the inhabitants of the city of Leiria and the people around the country had unanimously proclaimed the lawful government. At Alcobaca also the same patriotic movement had taken place, and at Porto de Moz on the 22d inst., in which latter place a sum of money had been captured which belonged to the rebels.

"Colonel Souza concludes his despatch with the following words:—A courier whom I sent to Carvelhos yesterday, has just returned, and he informs me that news had reached Leiria that the city of Coimbra and the whole population for miles around, had risen in favor of the Queen.

"These occurrences are positive proofs that the hour of the entire redemption of our country has at last arrived: We already view the people—of their own accord, and without the aid of an avowed force—display their patriotism, fidelity and true sentiments.

"The rebels only hold the ground they tread upon, and will soon be expelled from that, and those who are so fortunate as to escape, will go and bury their opprobrium and shame in foreign lands, losing for ever a claim to their own country, which they devastated to deliver up to the usurper.

FROM SPAIN.

The barque Madeline has arrived at this port from Bilboa. We annex an extract from a letter received by a respectable merchant of our city—*Nat. Gaz.*

"BILBOA, October 25, 1833.

"This province has declared in favor of Don Carlos, and crowds of the peasantry are flocking in from the country with arms. The Guerillas, so formidable when Bonaparte invaded this country, are in considerable force, and have also declared for Don Carlos. All capable of bearing arms have been impressed, and it will take 20,000 regulars to put down the insurrection here, and we are hourly expecting them.

"The friars and priests have all declared for the Don, and cry out extermination to the 'Blacks,' or Queen's party. All the mails have been stopped and all communications burnt; the Carlists having taken possession of all the roads and passes, and I was for several days kept without a passport.—You may be sure I shall feel glad to leave, for in my opinion the civil war is likely to last several years.

"The town, for the last two or three nights, has been more quiet, but no person is allowed to be out after dark."

LATEST FROM THE NORTH OF EUROPE!!

We are indebted to Captain Wachter, of the ship New York, for Bremen papers to Oct. 23d, inclusive. We translate the following paragraph.

VIENNA, Oct. 12.—His Highness, Prince Metternich, Chancellor of State, left, yesterday, for Linz, where their Majesties, the Emperor and the King of Bavaria, have already arrived. After the return of Prince Metternich, which is expected to be on the 19th, something definite will be known concerning the proposed Ministerial Conference. The place and time are not yet known; nor, indeed, the topics which are to occupy their deliberations; tho' it is believed the measures which may be deemed necessary for the security of Germany, and of Europe, will form a subject of primary interest. It is also probable that the Plenipotentiaries of the different German Courts will discuss the question of the disposition of the grand Duchy of Luxembourg. It is known that Prince Felix Schwarzenbourg has been sent on a mission to this Court. We also learn that the Austrian provisional Charge d'Affaires to Cassel, Count Dietrichstein, goes to Brussels, to officiate in the same capacity until the return of Mr. Von Newmann, who is now in Italy. —Yesterday a French Courier was despatched to Italy,—it is not known for what object. Count St. Arclaire returned day before yesterday from Baden to Vienna. Since the departure of Charles X. from Prague, a great many young Carlists have arrived here to congratulate the Duke of Bordeaux on attaining his majority: among others, M. Walsh, who has presented the young Duke with a sword, bearing the inscription *ventre saint gris*, and a pair of golden spurs. The Duchess of Berri has arrived with her husband, Luchessi Palli, at Laybach. She has given up her former intention of accompanying the French Royal family to Prague, and will return to Italy. The sister of the Duke of Bordeaux is said to have paid many thousand francs to defray the traveling expenses of the poor French people who had come to Prague to congratulate her brother, and even offered her pearl necklace, which, however, was declined. Most of the young Carlists have already set out on their return to France.

FROM VALPARAISO.—The Boston Commercial Gazette of Friday contains a letter from its correspondent at Valparaiso, dated July 30.—This is a month later than previous advices. The letter gives a lamentable picture of the state of society, and of the government of Peru, which is represented to be in a very agitated state—arrests, imprisonments, banishments, and executions, becoming daily more and more frequent. Gamarra, the present Chieftain, it is understood, will not be re-elected in the legal way, and intends to hold over, and try his chance in defiance of the Electoral college, relying on military support.

In CHILI, says the writer, the science of government is somewhat better understood. A new political constitution has just been formed at Santiago; and the ceremony of swearing to it was the other day enacted in that city. There was, according to the custom of the country, a great civic and military display on the occasion.

Many speculations are made by the writer, as to the present disturbed condition of the South American republics, and of the disposition of the ruling powers to usurp authority belonging to others, and not confided to them.

From the National Intelligencer, Dec. 7.

Restricted as to time, we seize what little of it we have left to put upon paper, before we forget it, one thought, suggested by the perusal of the Secretary of the Treasury's reasons to Congress for the removal of the deposits. It is this. Of these reasons, one of the leading and most plausible (for some of them have not the weight of a feather—no, not of a thistle down, which the breath of a child blows immeasurably out of sight) is, that the charter of the Bank of the United States is to expire in 1836, and the operation of its natural death ought to be made easy by gradually reducing its circulation, and contracting its action. This, the Secretary of the Treasury argues, is to be accomplished by transferring to the local Banks the public funds, heretofore deposited in the Bank of the United States, to prepare and qualify them to supply to the Government and the People, the advantages now derived from the Bank of the United States. This is the argument. Now, let us exemplify this notable theory, as it will be tested in practice. For a particular case, we will take that of the Banks in the District of Columbia.—To one of these Banks, as our city readers know, (and as the members of Congress who are *reasoned* with by the Secretary will very soon learn, if they have not found it out already,) the care and disbursement of the public moneys has already been transferred from the office of the Bank of the United States in this city. This transfer is made, be it observed, for one reason, because the charter of the Bank of the United States expires as early as the year 1836. Very well. How long to run has the charter of the Bank to which the deposits have been thus transferred? Why, *just as long as the charter of the Bank of the United States;* that is, to the year 1836, and no longer.—What becomes of the Secretary's *cogent* reason for the removal of the deposits? What probability is there, that the Government deposits will be in any wise more innocent in the Bank of the metropolis than in the Bank of the United States, or that the former Bank will wind up its affairs more safely and usefully to the Government, by a given time, than the latter? Perhaps we may be told that, when the end of the Bank of the metropolis draws nigh, the deposits may be transferred to some other substitute Bank, within the District of Columbia. That would be a very unlucky reply, though the only one; for it so happens that the charters of *all* the Banks in the District of Columbia, (except one of them that is broken to shivers) *expire on the very same day*, viz: on the third day of March, in the year of our Lord, 1836. The Secretary of the Treasury, however, can assign no better reason for not waiting for *the proper action of Congress*—of the representatives of the people—on this subject, than that the charter of the Bank would expire in the year 1836.

The particular case here considered, is the case of all the Banks throughout the Union. The charters of all of them are more or less limited, and all liable to expire, at no long intervals, amid throes as agonizing at least as those of the Mammoth Bank, as its opponents term it.

The Post Office.—It appears that, from the commencement of Mr. Barry's administration, the concerns of the Post Office have been officially misstated. In the first quarter, he underrated the expenses more than $64,000, and, on the first of July, 1832, instead of having a surplus of $202,811, as he stated in his official report, there was a deficiency of $2,844. It appears incredible that an officer could, by any process of book keeping, imagine that he had more than $200,000 in pocket, when he was in debt nearly $3,000. If he so far mistook the mark before, how can Congress be certain that he has not made a mistake of equal or greater magnitude in the present instance? In July last, the department was indebted, after applying all "available balances due," $195,208. These "available balances" we presume to be debts outstanding against post masters—if so, they will hardly be found "available" when required.

But, supposing the whole amount to be at hand, and the above to be the actual deficiency, it will appear that this cheap and reforming administration have sunk, in this department alone, in five years, the above sum of $195,208, and the balance left by Mr. M'Lean, of $300,000, making together the neat total of $500,000, or $100,000 per annum, *by a mistake in book keeping.* Some will think that this is "paying too dear for the whistle;" but the work of reform must proceed, though it take the last shilling in the Treasury to accomplish it.

This matter will, no doubt, claim the immediate and serious consideration of Congress; when we hope that the whole of the mysterious proceedings in the Post Office Department will be exposed to public view. It is right that those who are so delighted with this reforming administration, should know at what cost it is obtained.—*Balt. Chron.*

The largest quantity of Sperm Oil, ever brot' by one vessel into the United States, arrived at New Bedford, (Mass.,) within the last week, by the ship Braganza, which brought *four thousand three hundred barrels.* The price paid for the ship in New York was $4,500, and the value of this cargo is *one hundred and ten thousand dollars.—Phila. Chron.*

Bourmont is said to have acquired enormous wealth by the capture of Algiers, the greater part of which he has invested in the British and American funds, those of France not being thought quite safe for the purpose.

A few days ago, some children were playing in the Kent road, near Blackheath, amusing themselves with making grottos of oyster shells, and, in order to give effect, one of the children went home, and begged of his mother to let him have two old pictures that were lying about the house, and considered but as useless lumber, to adorn their grotto. This was readily granted, and the old pictures were placed on each side of the grotto. In a short time, a Jew dealer came by, and, after looking at the pictures for some time, he offered to give the children 6d. for them; the children refused, and said that they belonged to their parents. The Jew at last offered 5s., but was still refused, and at last went to their parents, and offered 10s.; but the extreme eagerness of the Jew excited some suspicion that the old pictures were of more value than was suspected, and this was confirmed when the Jew offered 5l. 5s. for them, which was also refused. The next day, the father of the children took the pictures to Mr. Angerstein, at Blackheath, to inquire if they were of any value, and that gentleman gave him a letter of recommendation to a person in London, who purchased them for £1,400, and they have since been sold for considerably more.

Cherokees.—The Athens Banner of the 22d ult. says:—We are informed by a gentleman from Floyd county, that the deliberations of the late Cherokee Council, held at Red Clay, Tenn., were of a very boisterous character, and resulted in a complete split between the emigrating and anti emigrating parties.

An attempt was made by the latter party to remove from the Executive Council, Messrs. Ridge and Coody, the leading friends of emigration, which failed. Those individuals then tendered their resignations, which were accepted. It is thought they will enroll their names for emigration, and with them nearly one half of the Indians will go west of the Mississippi. Our informant says the enrollments were going on rapidly.

A new delegation to Washington was appointed, consisting of Ross, M'Kay, and others—names not recollected.

The Charlestown (Va.) Free Press states that a packet boat has been placed on the Chesapeake and Ohio Canal, to ply regularly between the Point of Rocks and Harper's Ferry, "to meet the Rail Road Cars running to and from Baltimore," by way of Frederick. Travelers who leave Harper's Ferry at five in the morning, will, by this conveyance, reach Baltimore early in the evening of the same day. The other hours of starting from the Ferry are also regulated so as to prevent delay to those wish to pass the Point.—*Battimore Amer.*

The new steamboat building at Troy, called *Burden's River Sleigh*, is thus described by a tourist:

"Several accounts have been given of this new steamboat. Having confidence in the good sense and mechanical skill of the inventor, I had great curiosity to see what his new steamboat was like. It was just far enough advanced to give me a fair opportunity to see and understand the whole machine. The long tubes which form the runners are as yet entirely exposed to view.

They are 300 feet long 8 feet in diameter at the centre, and taper off to points. They are 16 feet apart and held together by tie timbers and the frame of the engine and the wheel. The greater part of the engine was already in its place. It is a high pressure of 75 horse power. The wheel occupies the whole space between the tubes, and is 30 feet 8 inches in diameter. With a sweep of 16 feet to the paddles and a revolution of over 90 feet, the power of the wheel must be vast. It is placed at the centre of the boat. With the weight of the engine and of the timbers the tubes sunk apparently only about 30 inches at their centres, while the points were from one to two feet above the water. The immense power of the wheel, applied to a machine so buoyant and exposing so little resistance to the water, and whose extreme length and form will occasion little or no slack water, will unquestionably produce a speed never before hoped for on the water. The cabins will be built in the course of the winter. There will be two, one fore and one aft of the wheel, each at least 100 feet long by about 40 wide. Mr. Burden, the projector of the boat is well known as the superintendent of the Nail Factory in Troy, and as the inventor of a machine for making spikes. He is an ingenious mechanic who has raised himself by industry, probity and talent, high in the esteem of all who know him. Many, who are too largely interested in steamboat property to wish his project success, have little doubt that the plan will entirely satisfy every expectation.

Branches look out.—We are positively assured that the deposit Banks did lay aside all the Savannah branch notes they could collect, to give to Kendall's broker in this city, to have them sent on to make a run on that branch. We are further assured, that a discount on good paper of a bona fide character, as was supposed, was obtained at that branch for $150,000, and that the specie for the notes was demanded as soon as payment for the discounts was made. We also learn that Kendall's broker meditates an attack on the Mobile branch. —*N. Y. Evening Star.*

It appears that the port of New York is to be visited by an Austrian squadron. Captain Winsor at Boston, who left Trieste on the 8th October, states that two frigates and a corvette were fitting out at that place by the Austrian government, to convey 600 Polish officers, as passengers, to New York.—*Poulson.*

The People's Money.—It is recommended by several of the UNION editors, that Congress, if they are not disposed to restore the Government deposits to the United States Bank, should inquire into the character of the institutions to which they have been so strangely transferred.

This will follow as a matter of course. It is one of the *duties* of Congress—a duty which cannot be passed lightly over. A committee will necessarily be immediately appointed to investigate closely the character of the Banks which Andrew Jackson, in the plenitude of his power, has chosen as the depositories of the public moneys.—*Lowell Jour.*

FAIRBANK'S PLATFORM SCALES.

THESE scales are constructed upon an improved principle; are fitted up with great care by the manufacturers, and warranted to weigh with accuracy from half a pound to 12,000. Being placed in, and forming part of, the floor, the process of weighing is performed with ease and facility, while the space they occupy may be improved as a passage way or for other purposes.

The construction of these scales is such that they are little liable to derangement of wear, and their perfect operation will be guaranteed for any reasonable length of time.

The usual objection, that a new method of weighing cannot be safely entrusted to unskilful hands, is obviated by the use of the improved BALANCE, concerning which are the following remarks in the Journal of the Franklin Institute, of the state of Pennsylvania, for the promotion of the Mechanic Arts, for June, 1833. (Edited by Thos. P. Jones, M. D., late Superintendent of the Patent Office, at Washington, Professor of Mechanics in the Franklin Institute, &c.

"The Messrs. Fairbanks, some time since, obtained a patent for a Platform Weighing Machine, and this mode of adjuating and graduating the Beam of the Balance, and the weights, was devised by them with a view to its employment with the before mentioned machine. We have had an opportunity of examining one of their balances, and have been much pleased with it: this examination, however, was not necessary to the conviction that it possesses a just claim to the character of a real improvement, the whole arrangement being so simple as to enable any person to perceive that it is well adapted to the purpose contemplated, that of facilitating the business of weighing, and more especially of heavy articles."

The subscriber, as Agent, will receive orders for the above Scales, which will be made in this city to order. They can be seen at his Warehouse, No. 84, Front street.

Nov. 8, 1833. MOSES ATWOOD.

SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

1	tract of land	containing	330 acres
1	do	do	330
1	do	do	67
1	do	do	7
1	do	do	40
other lots, containing about			6

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county---and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others--- a soil rich and productive---the neighborhood abounding in coal---well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

It will be sold in a body, or in parcels, to suit purchasers.

Terms of sale will be reasonable.

Information can be had by enquiring of the subscribers, two of whom live in the neighborhood, and one on the premises.

WILSON & SMITH, from N. York,

RESPECTFULLY inform the citizens of Pittsburgh and the neighboring towns, that they have commenced the manufacture of the above beautiful and elegant article, so much admired and worn throughout Europe, and the principal cities in the United States.

W. & S. beg leave to observe, that, after various experiments, they have at last succeeded in bringing this Hat to the highest state of perfection, and they can assert, with confidence, that in point of color, lightness, elasticity, durability, and general beauty of appearance, they cannot be surpassed by the most expensive Hat that is made. Gentlemen are invited to call and examine them, and judge for themselves.

Wholesale Dealers supplied at the same prices as in the New York markets.

DOCTOR ROBERT'S

☞*WELCH MEDICAMENTUM*☜

FOR the cure of Dyspepsia, Liver Complaints, Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,

From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

UTICA, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer s vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

GEO. W. CARPENTER'S

COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes giving temporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradually increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases. and is a pleasant medicine to take.

TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.

Orders from all parts in the Union will be promptly and most carefully attended to, and particularly in supplying *sorts* for all founts furnished by their predecessors, Binny & Ronaldson, and Richard Ronaldson.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention, state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.
